README: RCT Registry data and outputs

This directory contains outputs from an analysis of the AEA RCT Registry. Source code and original outputs are available at https://github.com/J-PAL/AEA_registryanalysis.

We synchronize using a download, instead of a "git submodule", because Overleaf does not like such structures. Thus, this must be manually done on an intermediate system.

```
./sync-registry-git.sh
```

Should do the trick. ONLY works once public!
